Webasto Order Processing Instructions and Policies

There are four different ways to place an order:

Phone: 1-800-860-7866 or 1-810-593-6000 and follow the prompts to place an order.

When placing an order via phone, please have all information prepared prior to calling: P.O. number, part numbers, ship to location & shipping method.

After an order has been placed with your customer service representative, please provide them with a fax number or email address to receive an order confirmation to review before the product ships.

Fax: 1-810-593-6001

When placing orders via fax, all orders must include correct part numbers, quantities and pricing along with clear ship to location and shipping method. An email address or return fax number is required for order confirmation to be sent back for review before the order will be processed and shipped.

Email: order@webasto.com

When placing orders via email, all orders must include correct part numbers, quantities and pricing along with clear ship to location and shipping method. An email address or return fax number is required for order confirmation to be sent for review before the order will be processed and shipped.

E.D.I.

If an E.D.I. system is available to a customer, all orders must be placed through that system. Phoned in orders will not be accepted from dealers that have this system available to them in order to prevent duplication of orders.

Shipping Policy

All orders received by 2:00 pm EST will be reviewed same day. A follow up communication will be sent confirming the order and ship date.

Webasto Freight Policy

All orders are shipped F.O.B., Fenton, Michigan. Webasto has negotiated special rates with several carriers and offers these savings as a prepaid or bill-back program.

If you choose to use the prepaid or bill back program, the freight will be charged on your invoice. Shipments can also be shipped freight collect.

Urgent/Emergency Orders

Webasto will make every effort to ship emergency orders the same day or the next day via premium freight. An additional premium freight cost will be the responsibility of the person ordering.

Off-shore items are 2-3 weeks expedited.

Webasto Warranty: Heaters – 24 Months

All heater products - coolant heaters and bunk heaters/ air heaters have a two year warranty from the date of installation, or 2,000 operating hours, whichever comes first. The warranty will be valid up to 3 years after the sale of the product but not to exceed 2 years from the date of installation.

Webasto Warranty: Spare Parts – 6 Months

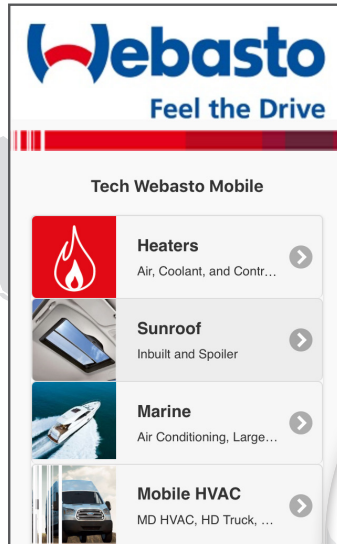

All service parts have a 6 month warranty after installation or the balance of the warranty of the unit they are installed to whichever is longer. If the heater still has 12 months warranty left, the spare part will be covered under the heater's warranty.

Heavy Duty Truck

As a world market leader, Webasto develops and produces air heaters for interior cab comfort and coolant heaters for engine pre-heat. Both systems provide an efficient working environment even at extreme outdoor temperatures.

Webasto air heaters provide immediate heat, making interiors more comfortable for drivers while saving fuel from engine-off operation. The air heater is also an ideal solution for interior cargo areas. Available with an output range of 7,000 – 18,700 BTU/h.

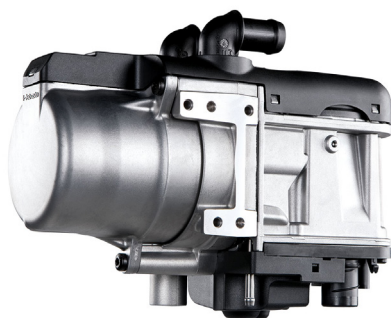

Webasto coolant heaters get to work before drivers arrive, pre-heating the engine, eliminating cold starts and warming the cab's interior. They are available with an output range of 17,200 - 109,000 BTU/h.

Webasto Air Heaters:

- Use as little as 1 Gallon (3.8 Liters) of fuel in a 22 hour period
- Fast return on investment
- Quiet operation ensures a restful night's sleep
- High heat output in a compact design

*These benefits are specific to Air Top 2000 STC

Webasto Coolant Heaters:

- Use as little as 1 Gallon (3.8 Liters) of fuel in a 10 hour period
- Fast return on investment
- Eliminate cold starts
- Provide engine pre-heat and reduce engine wear and tear
- Reduce costly DPF maintenance

*These benefits are specific to Thermo Top Evo

Complete Commercial Truck Heating Solutions

Air Heater Features:

- Provides rapid cab heating without idling
- Save thousands of dollars a year in fuel - use as little as 1 gallon (3.8 litres) of fuel in a 22 hour period
- Quiet operation ensures a restful night's sleep
- Self-cleaning mode for optimal performance

Coolant Heater Features:

- Engine pre-heat without idling
- Improve DPF performance
- Reduces Filter Overloading, Face Plugging and Thermal Cracking
- Reduces emissions by up to 66%*

* Tested by independent lab according to TMC recommended practice 432A & 1102

Webasto coolant heaters go to work before drivers arrive, Pre-Conditioning the coolant in the engine and eliminating cold start concerns. Webasto heaters defrost and defog windshields quickly, and provide excellent supplemental interior heat.

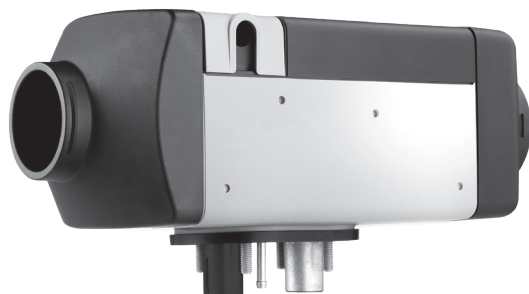

The concept of Webasto in school bus engines is simple. Heat the cold coolant from the engine's block, then pump it back to the vehicle's engine and heat exchangers. The result: Your engine is Pre-Conditioned and the vehicle's heat exchangers distribute an abundance of heat to the vehicle's interior. Idle time is eliminated and emissions at start-up are reduced.

Webasto Coolant Heaters:

- Pre-Heats the engine to eliminate cold starts and extends engine life
- Provides in-duty supplemental heat for increased driver and passenger comfort
- Reduces vehicle emissions eliminating unnecessary idling
- Stops white smoke at engine start-up and eliminates diesel knock
- Reduce costly DPF maintenance

*These benefits are specific to Thermo Pro 90

Webasto Air Heaters:

- Use as little as 1 Gallon (3.8 litres) of fuel in a 22 hour period
- Fast return on investment
- Keeps drivers, passengers, or cargo warm
- High heat output in a compact design

*These benefits are specific to Air Top 2000 STC

Webasto auxiliary heaters are designed to perform in the most demanding off-highway conditions. They offer an ideal solution for engine pre-heat, operator comfort, increased productivity, safety and mission readiness for a wide variety of vehicles and machinery. Webasto heaters are versatile and can be used in mining, construction, oil fields, forestry, agriculture, industrial, and other off highway applications.

Webasto Air Heaters:

- Use as little as 1 Gallon (3.8 litres) of fuel in a 22 hour period
- Fast return on investment
- Increase operator comfort and productivity
- High heat output in a compact design

*These benefits are specific to Air Top 2000 STC

Webasto Coolant Heaters:

- Use as little as 1 Gallon (3.8 litres) of fuel in a 10 hour period
- Fast return on investment
- Eliminate cold starts
- Provide engine pre-heat and reduce engine wear and tear

*These benefits are specific to Thermo Top Evo

As a world market leader, Webasto develops and produces air heaters for interior cab comfort and coolant heaters for engine pre-heat. Both systems provide an efficient working environment even at extreme outdoor temperatures.

Webasto air heaters provide immediate heat, making interiors more comfortable for drivers while saving fuel from engine-off operation. The air heater is also an ideal solution for interior cargo areas. Available with an output range of 7,000 – 13,300 BTU/h (2.1 - 3.9 kW).

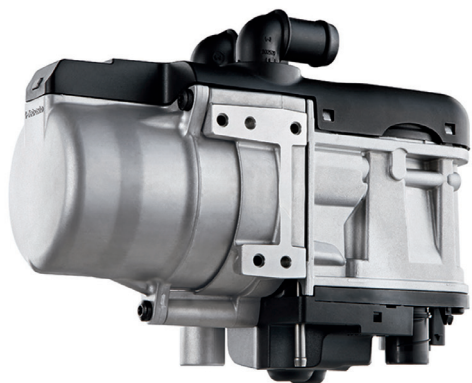

Webasto coolant heaters get to work before drivers arrive, pre-heating the engine, eliminating cold starts and warming the cab's interior. They are available with an output range of 17,200 - 120,000 BTU/h (5.0 - 35.2 kW).

Webasto Air Heaters:

- Use as little as 1 Gallon (3.8 litres) of fuel in a 22 hour period
- Fast return on investment
- Reliable passenger or compartment heating
- High heat output in a compact design

*These benefits are specific to Air Top Evo

Webasto Coolant Heaters:

- Use as little as 1 Gallon (3.8 litres) of fuel in a 10 hour period
- Fast return on investment
- Eliminate cold starts
- Provide engine pre-heat and reduce engine wear and tear

*These benefits are specific to Thermo Top Evo

Fuel Savings Calculator

How to use:

1. Go to www.techwebasto.com and click on **Tech Tools > Fuel Savings Calculator**

2. Choose the appropriate language.

The screenshot shows the 'Savings Calculator - Truck Heating Thermo Top C' interface. A red box highlights a language dropdown menu with options for USA, USA, and Canada. The main interface is divided into two columns. The left column contains input fields for 'Fleet' (Fleet Size: 5, Engine Volume/Liter: 10, Working Days/Week: 5, Engine Idling Hours/Day: 4, Weeks of Heating/Year: 20) and 'Resources' (Fuel Costs/Gallon in \$: 2.00). The right column displays results for 'Total Fuel Costs for Engine Pre-Heat' (with Webasto: 1,800 \$*, without Webasto: 14,880 \$), 'Potential Savings' (indicated by a gauge), 'Money Savings/Year' (6,005 \$*), 'CO2 Savings/Year' (38,128 lbs*), and 'Return on Investment' (After 6.49 months). A red button at the bottom right says 'Get your individual offer!'.

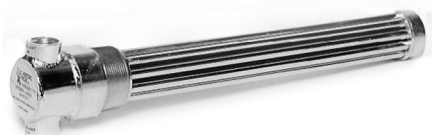

Category	Value
Fleet Size	5
Engine Volume/Liter	10
Working Days/Week	5
Engine Idling Hours/Day	4
Weeks of Heating/Year	20
Fuel Costs/Gallon in \$	2.00
Total Fuel Costs for Engine Pre-Heat (with Webasto)	1,800 \$*
Total Fuel Costs for Engine Pre-Heat (without Webasto)	14,880 \$
Potential Savings	6,005 \$*
CO2 Savings/Year	38,128 lbs*
Return on Investment	After 6.49 months

3. Input the appropriate data

Fluid Warming Products and Accessories

When combined with hydraulic fluid warmers, Webasto coolant heaters can also be used to heat hydraulic fluids. This is an ideal solution for engine pre-heat, operator comfort and increased productivity. Webasto offers this unique combination that will eliminate cold starts, reduce maintenance costs and have your vehicles ready to go when workers arrive to start the day.

In addition to fluid warming products, Coolant Dam Pressure Testers are also available. These unique units allow for simple repairs without draining the coolant. Using shop air, this time-saving tool holds engine coolant inside the engine, with little or no coolant loss, even when pipe plugs, sensors, valves and other components are removed for replacement or repair.

Benefits of Engine Pre-Heat + Hydraulic Heating System:

- Reduce carbon footprint, save fuel and reduce emissions
- Eliminate the need to idle for engine and hydraulic system heat
- Increase productivity: workers don't have to arrive early to warm up vehicles and equipment
